EDUCATION

VJTI College | B. Tech in Electrical Engineering
• CGPA: 7.75/10

June 2017

EXPERIENCE

Capgemini Technology Services India Limited

November 2021 – Present

Mern stack Consultant

November 2021 – Present

Responsible for developing new functional components in React, developing new REST APIs using express and fixing existing APIs as per requirements.

Key Responsibilities:

- Responsible for building high quality, scalable and reusable components in react
- Maintaining parent and child elements by using state and props in React JS
- Responsible for providing RESTful API using Node JS, Express JS, MongoDB and Mongoose • Implemented token based authentication on backend.
- Responsible for parsing JSON data to and from the server for presentation and storage
- Designed dynamic and multi-browser compatible pages using HTML, CSS, React JS

Mern stack developer

April 2020 – November 2021

Worked as a Mern stack developer using React in frontend and Express in backend.

Key Responsibilities:

- Designed and developed functional components for web application using React JS, JSX and CSS • Worked on developing REST APIs using express and Node JS and stored the data in Mongo DB • Integrated React component with backend APIs to fetch and update data from UI.
- Used CSS to change the style of web layouts and debugging the error issues with CSS • Involved in daily SCRUM meetings to keep track of project status

Software Development Engineer in Test

July 2017 – April 2020

Responsible for Development and execution of new automated test cases in Regression suite along with maintenance of existing Regression suite containing 900+ test cases.

Key Responsibilities:

- Developed regression automated Test case in Selenium WebDriver using C# and SpecFlow in BDD framework
- Helped Devops team to integrate the sanity test in CI-CD pipeline
- Execution and failure analysis of existing Regression suite consisting of 900+ test cases including reporting and tracking of defects as encountered via automated scripts.
- Worked on enhancing existing framework by adding WCF plugin validation, reading and storing Nested JSON data using Newtonsoft
- Involved in designing of Automation Test cases using Selenium WebDriver, Java, TestNG and Maven

SKILLS

Programming Languages and Framework

Proficient – JavaScript | React JS | HTML | CSS | Express JS | Node JS | Rest APIs | Mongo DB | SQL | Cypress | C# | Java | Selenium | Kotlin

Software

Visual studio | Git | TFS | Azure | Eclipse | VS code
